

Final Output of Campaign Planning Agent

Step 1 – Funnel Stage
Stage : Conversion Why : The goal "increase first-time purchases" targets a direct, measurable transactional action (a purchase), which defines the Conversion stage.
Step 2 – Selected Channels
- Google Search [CPC] Captures high-intent searches from 22-38 women in the UK and US actively looking to buy skincare and wellness products, driving first-time purchases. - Retargeting [CPA] Re-engages the existing 42k TikTok following and warm site visitors among these skincare-focused women to convert them into first-time buyers on a pay-per-acquisition basis. - Meta Ads [CPC] Instagram's strong visual skincare and wellness communities let us target UK/US women 22-38 with shoppable, click-optimized ads that drive direct purchases.
Step 3 – Budget Allocation
- Google Search: GBP 2,500.00 (50.0%) As the highest-intent channel capturing active purchase queries, Search leads the conversion stage ahead of Retargeting and Meta because it intercepts users already in buying mode. - Retargeting: GBP 1,750.00 (35.0%) Retargeting is the strong secondary channel, re-engaging warm prospects who have already shown interest, complementing Search's new-intent capture with efficient CPA-priced reconversion. - Meta Ads: GBP 750.00 (15.0%) Meta plays a supporting role here, sustaining lower-intent demand and feeding the audience pool that Search and Retargeting ultimately convert, so it receives the smallest share.
Step 4 – KPI Targets
- Google Search CTR 6.0% CPA GBP 8.50 ROAS 5.29x - Retargeting CTR 3.2% CPA GBP 7.50 ROAS 6.00x - Meta Ads CTR 1.5% CPA GBP 12.50 ROAS 3.60x
Step 5 – Keywords
- buy GlowDrop serum online - GlowDrop skincare first order discount - GlowDrop serum price UK - GlowDrop free trial sign up - order GlowDrop glow serum today
Step 6 – Campaign Brief
This conversion-stage campaign is designed to increase first-time purchases of GlowDrop serum among women aged 22 to 38 with an active interest in skincare and wellness across the UK and US. The campaign will run across Google Search, Retargeting, and Meta Ads on a total budget of GBP 5,000.00, with Google Search receiving GBP 2,500.00 (50.0%), Retargeting GBP 1,750.00 (35.0%), and Meta Ads GBP 750.00 (15.0%). Google Search should hit a 6.0% CTR, a CPA of GBP 8.50, and a 5.29x ROAS, with bidding focused on high-intent keywords including "buy GlowDrop serum online", "GlowDrop skincare first order discount", "GlowDrop serum price UK", "GlowDrop free trial sign up", and "order GlowDrop glow serum today". Retargeting must deliver a 3.2% CTR, a CPA of GBP 7.50, and a 6.00x ROAS by recapturing site visitors who did not complete a first purchase, while Meta Ads should reach a 1.5% CTR, a CPA of GBP 12.50, and a 3.60x ROAS to drive incremental new-customer acquisition. Optimize spend toward the channels meeting or exceeding these CPA and ROAS targets throughout the flight.
